Dear Norman, 4/25/05

Sent a copy of Howard Goodman's report in the Philadelphia Inquirer on your four days edifying history majors at Penn, I was taken by what the quotes you as saying in Oswald's Tale:

"'Mailer said he decided 'it was likely' that Oswald acted alone in killing President John F. Kennedy – not from the evidence, which is impenetrable', but because I got to know his character.'"

When we met at Georgetown University in 1973 I offered you access to all the many pages of FBI records I had. You said you'd be in touch. But you were not.

I could not very well ship you thousands of pages nor could I copy them and send you all those copies.

Some of it as well as some of the more recent FBI and other records I've gotten are used in my NEVER AGAIN!

So, I'm asking Harman Graf to send you a copy so you can decided for yourself whether if one does not have two Pulitzers can find it other than "impenetrable" you also might.

Sincerely,

Harold
